Fachada ventilada
cerámica fotocatalítica
*Photocatalitic ceramic
ventilated façade*

Descontaminante y Autolimpiante
Decontaminant & Self cleaning
ISO 27448- EN 221971

Funcionalidad
Functionality

Sistemas mecánicos con ausencia de mantenimiento, fácil limpieza y que pueden suponer un ahorro energético del 30%.

Mechanical systems with low maintenance, easy cleaning and in specific situations, energy savings over 30%.

Asistencia técnica
Technical Assistance

La personalización de soluciones es una de nuestras fortalezas nos hace ser un compañero preferente en los proyectos de fachadas ventiladas.

Bespoke solutions is one of our strengths that makes us a suitable partner in ventilated façade projects.

Rehabilitación
Refurfishment

Nuestros sistemas permiten a edificios antiguos adquirir un nuevo diseño exterior y reducir el impacto medioambiental con una mayor eficiencia energética.

Our systems are suitable for renovation of existing buildings improving the visual aspect and their energetic efficiency.

Cerámica antibacteriana
Antibacterial ceramic

Active Plus es un tratamiento fotocatalítico que confiere a la fachada tres beneficios básico: antibacteriano, descontaminante y autolimpiante.

Active Plus is a photocatalytic product that acts as an active ingredient in our products with antibacterial, self-cleaning and decontaminating benefits.

SISTEMAS DE FACHADA VENTILADA EXTRUSIONADA
